Brooklyn expects, if it can keep up its present rate of growth, to have a population of 2,210,000 in 20 years. The borough now has 1,240,000.

ou can get rich quick in the poultry

many good poultry journals that are now published, containing very much that is of benefit to the poultryman.

great respect for the fruit business; it certainly goes along nicely with the poultry business.

I am here today under the auspices of the Connecticut Poultry association, which was formed about four years ago in the city of Hartford to further the interests of the poultry industry. Prof. C. K. Graham, formerly of the Connecticut Agricultural college, was its first president, and I think we are deeply indbeted to Prof. Graham for what our association is today. We now have between 300 and 400 members; we hope during the coming year to raise our membership list to at least 1,000, and to this end I want all interested to loin with us and help all the poultrymen of the state, and especially the beginners.

Poultry for pleasure and profit certainly has many attractions. There are many people, including young and old, male and female, that contemplate going into the business some time, if not now, because they think it is an easy business, and the profits are so great. I have been told that up in Canada when a young man goes to the agricultural college and asks about the poultry business, as to what size plant he must equip, how many hens he must keep to make a living, etc., they ask him if he has ever been in the drug business. Why, no; what has that got to do with it. The idea is in order to go into the drug business one must thoroughly understand the business. As a rule, people who contemplate go-to into the drug business one must thoroughly understand the business. As a rule, people who contemplate go-to into the drug business one must thoroughly understand the business. As a rule, people who contemplate go-to into the drug business one must thoroughly understand the business. As a rule, people who contemplate go-to into the drug business one must thoroughly understand the business. As a rule, people who contemplate go-to into the drug business one must thoroughly understand the business. It also with the poultry and the profits are some many people, including the profits and the profits and the profits are some

attend to his duties this wee A Close Call.

Wednesday morning Charles Brown attempted to cross the railroad track here in his covered milk wagon, with a train on the main track. When he was haifway across the train backed and struck his wagon; turning it so that Mr. Brown stepped out upon the caboose of the train. The horse treed itself from the wagon, but did not run, and the wagon was damaged but slightly. slightly. Engine Damaged.

Freight engine 1222 of the C. V. rail-road went through here Thursday showing signs of a tumble into a ditch showing signs of a tumble into a ditch, up north, The engine was headed for New London for repairs.

One of the eggs gathered on Monmental farm this week was a sort of a freak. It came soft shell, no yolk, and in the shape of a question mark. What next?

Mrs. Mary Ladd, who has been very if for the past week with bronchitis, is improving.

Mrs. Warren Thompson of Fitchg lle was a recent caffer on Mrs. Carl

ng the winter with her daughter. Mrs. Noe Richards, in Jewett City, is visiting for a few weeks here with her laughter, Mrs. Louis Soucie.

A number of people owning mapis rees around here are tapping them and find the sap flowing freely. One years a milk pall full ready to boil ooy has a milk pall full, ready to be

Dwindling Glaciers. The international glacier commis-sion has just published its annual re-port on the variation of glaciers. Th-increase, which began in Scandinavi More and Better Eggs.

More and Better Eggs.

How to get more and better eggs is, I am sure, a question which we all wish to learn more about, and I want to emphasize the fact that the hen will not produce for us any eggs until the wants of her own body are supplied and she has a surplus to spare. So, you see, we must feed to that end a variety of grains, animal food in some available form, oyster shells, grit, charcol, clover hay or alfalfa, for bulk, and mangles or cabbage for green food for winter, with plenty of clean driable house with part mislin and part glass front, god warm roosting quarters, and plenty of something to tell us that will be both interesting and of great value. I have great respect for the fruit business; it certainly goes along nicely with the pountry business.

I am sure, a question which we all wish to learn more about, and I want to emphasize the fact that the hen will not produce for us any eggs until the wants of her own body are supplied and she has a surplus to spare. So, you see, we must feed to that end a variety of grains, animal food in some available form, oyster shells, grit, charcol, clover hay or alfalfa, for bulk, and mangles or cabbage for green food for winter, with plenty of clean driable house with part mislin and part glass front god warm roosting quarters, and plenty of something to tell us that will be both interesting and of great value. I have great respect for the fruit business; it certainly goes along nicely with the pountry business.

I am sure, a question which we all with the hatching aeagon is at hand.

So the mister medal, was won by the must content the musical content to first the musical content to emphasize the fact that the hen will not prove the musical and answers.

SOLVES PROBLEM OF BUST DEVELOPMENT

'Mdme. Du Barrie's Positive French Method Is A Marvel," Says Alvina DeCourcey

Different from Anything Else Ever Before Offered to American Women.

"I never saw anything in all my life to equal the Mme. Du Barrie Positive French Method of Developing the Bust," says Alvina DeCoureey, while on a recent visit to Mt. Clemens. "It is remarkable what it did in so short a time—in only three weeks.

"I began to think there was nothing which could develop the bust. I had tried every sing before this Du Barrie Method was first introduced to American women some time ago. It is now acknowledged to be without an equal in existence. I immediately tried it. It is wonderful. There is nothing like it.

The Mme. Du Barrie Positive French

"The Mme. Du Barrie Positive French Method is different from anything else ever presented to American women for bust development. It is successful for women of any age above 16, no matter what the condition of health, whether stout or thin, whether there is no bust development at all, or whether the bust hangs limp from no matter what cause. "The development is luxurious and lasting, reaching from 2 to 8 inches in 30 days."

In the most fascinating book ever written on bust development Mme. Du Barrie explains clearly the details of this French Method. It is simplicity itself, to the point of genius, yet different from any other, absolutely scientific, leaving nothing to guesswork."

We suggest to our lady readers that they send their name and address, not failing to enclose two cents in stamps to help cover postage, to Mome. Du Barrie, 1435 Quinlan Bidg., Chicago, Ill., and receive by return mail, absolutely free of charge, a fine illustrated booklet by Mdme. Du Barrie, with full particulars, etc., sent in plain sealed wrapper.
